Education

Year	Qualification	Institution	Grade/Score
2023 – 2027	**B.Tech** Computer Science & Engineering	Vishwakarma University Pune, Maharashtra	CGPA: 8.55 (TY)
2022	**12th Grade** (HSC)	SSMV Jr. College Yeola, Maharashtra	84%
2020	**10th Grade** (SSC)	De-Paul English Medium School Yeola, Maharashtra	91.2%

Experience

Wilo Mather and Platt Pumps Pvt. Ltd. | *ML and Full-Stack Intern* January 2026 – April 2026

- Built high-performance React 3D visualization using React Three Fiber and @react-three/drei, integrating 5MB+ GLTF pump models with real-time data panels and interactive controls for 45+ pump specifications
- Developed 8 responsive UI pages with Framer Motion animations, Tailwind CSS v4, and custom dark/light theme, featuring sub-50ms latency displays across AI-powered engineering workflows
- Architected modular React Router v7 navigation with 10+ route pages, reusable component libraries, and dynamic neural engine visualizations with real-time logging dashboards

Projects

Upscaler-AI | *AI-Powered Image Processing System*

- Architected a scalable microservices ecosystem using Docker to support high-performance image upscaling on both NVIDIA GPU and CPU-only architectures
- Integrated state-of-the-art Computer Vision models (Real-ESRGAN, GFPGAN) for super-resolution and face restoration, implementing Python-based automated quality assessment (NIQE)
- Developed a full-stack interface with WebSockets for real-time processing feedback and orchestrated automation workflows using n8n for production-ready deployment

Faculty Development Program Management Platform | vu-fdp.vercel.app

- Developed full-stack web application using React, TypeScript, and Firebase serving 3 user roles for managing Faculty Development Programs
- Engineered admin dashboard automating operational tasks, reducing administrative overhead by 40% through user management and automated reporting
- Officially registered and granted copyright by the Government of India's Copyright Office (Certificate No: LD-20250174733)

ML-Based Male Pattern Baldness Detection System

- Engineering machine learning model predicting baldness probability using genetic markers, lifestyle factors, and physiological data
- Developing age-specific prediction system with computer vision (OpenCV) for scalp analysis and pattern recognition; manuscript and patent under review

Research & Publications

Dachawar, M., Tong, V., **Utrankar, J.**, & Poornaprakash, S. (2025). "Tracing the Evolution of AI and ML in Oncology: A Systematic Metadata Analysis." *ICSCDS-2025* (DOI: 10.1109/ICSCDS65426.2025.11167501)

Utrankar, J., Gaikwad, V., & T., Ved (2025). A Comprehensive Management System for Educational and Professional Development Programs. Copyright Office of India (Certificate No: LD-20250174733).

Involvement

Visionary Core Member, Vishwakarma University – Visionary Club January 2024 – Present

- Drive innovative projects through strategic planning, organized events, and discussions that foster creativity and engagement among members
- Mentor new members and promote club objectives, ensuring successful execution of activities that enhance community awareness and involvement

Certifications

- **Getting Started with Artificial Intelligence** – IBM SkillsBuild *View Badge*
- **AWS Academy Graduate – Cloud Architecting** – Amazon Web Services *View Badge*

Technical Skills & Languages

Languages: Java, C, C++, Python, SQL, JavaScript, TypeScript **Spoken:** English, Hindi, Marathi
LeetCode: 150+ problems solved *(profile)*
AI/ML & Data: PyTorch, Generative AI, OpenCV,Scikit-learn, RAG Pipelines, Hugging Face Transformers, LangChain, Power BI
Web & Tools: ReactJS, Tailwind CSS, Three.js, Docker, WebSockets, n8n, Git, Linux/Unix, REST APIs
